**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert K. Tendler on 23 August 2005.

2. Amend the claims as follows:

Cancel claims 1-8 and 16-20.

***Allowable Subject Matter***

3. Claims 9 and 11-15 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or suggest one or more of the limitations found in independent claim 9. U.S. Patent No. 3,401,387 to Milligan et al. teaches a similar system to that of the present application. However, with respect to independent claim 9, the prior art of record fails to teach or suggest the steps of sizing the apex base

of the monocone to establish the high frequency cutoff of the monocone antenna; and feeding the antenna between the apex and the ground plane. Therefore, independent claim 9, as well as all dependent claims, is allowable over the prior art of record.

***Citation of Pertinent References***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents further show the state of the art with respect to monocone antenna structures:

- a. U.S. Patent No. 5,038,152 to Wong et al.
- b. U.S. Patent No. 5,523,767 to McCorkle
- c. U.S. Patent No. 6,593,892 to Honda et al.
- d. U.S. Patent No. 6,845,253 to Schantz
- e. U.S. Patent Application Publication No. 2005/0140557 to Kuroda et al.
